## Synopsis

The 4th Edition of the field's premier text on therapeutic modalities reflects evidence-based practice research and technologies that are impacting professional practice today. Step by step, you'll build a solid foundation in the theory and science that underlie today's best practices and then learn how to treat a wide range of orthopedic injuries. See what reviewers and instructors have said about previous editions... "This book is an excellent resource for students or for experienced athletic trainers, physical therapists, or medical personnel. The numerous tables and illustrations and appendixes further enhance this friendlier edition. The 'at a glance' pages give the reader a quick overview of the text for each modality. Rather than using a cookbook method, the author encourages clinicians to use their own decision-making process to apply modalities appropriately, depending on the tissue depth and type, the injury, and the goal of therapy. An easy-to-follow reference as well as a suitable textbook for students."—Rose L. Smith, PT, DPT, SCS, ATC, University of Cincinnati, Cincinnati, OH for *Physical Therapy*, Volume 85, No. 9, September 2005 "Therapeutic Modalities is a well-written...text that balances fundamental theory with clinical application...Covering all the essential modalities, this book can serve as an introductory text for athletic training students or as a useful clinical reference...A useful addition to the athletic trainer's resource library."—*Athletic Therapy Today* "I highly recommend this text to...students of physical therapy and athletic training."—*Journal of Orthopaedic and Sports Physical Therapy* "Provides a comprehensive survey of the use of therapeutic modalities in the treatment of orthopaedic injuries."—*Journal of Athletic Training*

## Sort review

About the Author Barbara Wells (Oxford, MS) is dean and professor at the University of Mississippi School of Pharmacy and executive director of the Research Institute of Pharmaceutical Sciences. Terry Schwinghammer (Oxford, MS) joined the faculty of the University of Mississippi in August 2005 as Professor and Chair of the Department of Clinical Pharmacy. In addition to authoring over 60 research papers and journal articles, he is editor of *The Pharmacotherapy Casebook*. Joe DiPiro (Charleston, SC) is Professor and Executive Dean of the South Carolina College of Pharmacy, an integrated program of the Colleges of Pharmacy of the University of South Carolina and the Medical University of South Carolina.

## What people say about this book

Grace Grinstead, "Condition of Textbook. Fair condition - some sort of cut along the binding of the book. Excited to use!"

Metal Mike, "Knight's book on modalities is much better, in my opinion. This is a decent book for modalities. It has some organization issues, and I found myself having to look back and forth through certain sections to find information that could have been included in the same area. Knight's book on modalities is much better, in my opinion."

T-A-L, "Good book. This book was required for my class and was helpful specifically in my Athletic Training Major."

jmiller17, "This book is getting me through school!!!. I bought this book as a complement to my main therapeutic book, but ended up using this book as my main one. Starkey goes into amazing detail and goes over each physiological effect of each modality. This is important so we know what each therapy does at a tissue and cellular level, Will be using this book for a long time,"

Kayla Ewing, "Good modalities textbook. Great for class and study for BOC"

Levi Brouse, "It's a book. This is a book."

Ace.V, "Great read full of information regarding how the different modalities .... Great read full of information regarding how the different modalities used in practice work while disclosing the many indications and contraindications."

selina, "Liked that the digital version lets me highlight and save .... Liked that the digital version lets me highlight and save notes and search terms in the book - matches up with my classmates book as well"

Qzip, "Five Stars. Great quality for a used book! Thank you!"

The book by Carol K. Taketomo has a rating of 5 out of 4.7. 133 people have provided feedback.
