Synopsis

Get the most out of your Merrill's Radiographic Atlas with the Workbook for Merrill's Atlas of Radiographic Positioning and Procedures, 13th Edition. Providing plenty of review and practice of the concepts found in the atlas, this workbook contains a wide variety of exercises — including labeling, anatomy identification, short answer, multiple-choice, matching, true and false, fill-in-the-blank, error identification, and more — that focus on the essential terminology, anatomy, and positioning information you need to pass the ARRT exam and thrive in the clinical environment. Correlation with main Merrill's Radiographic Atlas features exercises that support the digital positioning content in the atlas. Wide variety of exercises holds user's interest and provides a variety of interaction with the content. Exercises on identifying errors on radiographs prepare users to evaluate radiographs in clinical situations. Anatomy and positioning exercises provide balanced coverage of both topics. Abundance of labeling exercises ensures users recognize anatomical structures on actual radiographs. Comprehensive self-test at the end of each chapter enable users to accurately gauge their comprehension of the material and measure their own progress. Pathology exercises helps users understand which projections will best demonstrate various pathologies. NEW! New images reflect all the content updates in the main Merrill's text. NEW! Detailed review exercises that cover osteology, anatomy, physiology, arthrology and radiographic examinations. NEW! Additional images for identifying essential projections

About the Author Dr. Curtis has published several articles in journals, contributed to books, edited and reviewed educational books and products, and developed new products. She is the current author of international radiologic sciences education textbooks. Dr. Curtis has served in offices from secretary to president in her state affiliate and is still active in serving members and students. She holds several memberships with professional organizations and volunteers at national conferences for student competitions and hosting CE lectures for technologists and educators. Before entering academia, she worked as a radiologic technologist for various healthcare organizations. She continues to visit local clinical sites with current undergraduate students to stay current in the practice field. Dr. Curtis research interest is emergency preparedness and disaster response and serves on several college committees. She is the current university liaison for La Region 7 Hospital Preparedness Healthcare Coalition.

What people say about this book

Anna Kim, "Haven't started. I haven't started on this, I actually bought it before I even needed it, but it's what I need in the future.8/4/2018Page 297 is missing the letters on the labeling but I think it's going ABC from top to bottom.9/2/2018I deducted a star because I noticed this book was thinner than some of my classmates. When writing with a pencil, it leaves mark on the other side of the page. The pages are very thin. I thought it was normal until comparing it with the other book with thicker pages. If I knew there were different types, I would have purchased the thicker one, kinda hard to write with a pencil with this one."

Ebook Library Reader, "Just buy from Amazon first!. Such a nice copy. Thick sturdy pages that don't bleed thru. I bought my 1st copy elsewhere and got inferior quality - it had newspaper thin pages that acted like carbon paper and everything I wrote in the handbook bled down on to latter pages. I was soon envious of my classmates nicer copies that I learned they bought from Amazon. I quickly bought this thereafter!"

Sonia C., "For the price, it was worth it.. Only about 10 percent of the book had been written in"

Abdi Ruiz, "Just great!. I bought "used-like new" and I was hesitant but book does seem to be in new condition, it was a total bargain, and a great tool for study"

Ebook Library Reader, "Buy This. Purchased this to help with the Merrill's books. This workbook has been a lifesaver! We were not required to have this book for class, but it is such a help! Spend the extra \$ for this one!"

Buyer, "A MUST!. Perfect companion for the Merrill's, even the 14th edition. I just wish it was loose leaf."

Megan, "New condition, perfect spiral bound book. For a workbook, it should've been purchased "new". And though this is marked "used", it's definitely still in New condition. Very nice, nothing wrong with it, very nice spiral bound"

Mark, "Book. Good condition"

The book by Carol K. Taketomo has a rating of 5 out of 4.7. 123 people have provided feedback.
