Sort review

Each of these books contains 14 projects, all of which can be made from either common household items or those that are inexpensive and easily obtainable. The crafts are sufficiently varied, so boys and girls should find them appealing. Color photos illustrate the steps. One objection would be that on the spread about making a mandala in *Nuts*, there is no indication that it has any other significance than just being a design. *Papier-Mache*, oddly, does not have a recipe for the titular material. There is no explanation of why earth-friendly crafts are important. The simplicity of many of the projects, particularly those in *Clay*, make them suitable for burgeoning crafters., School Library Journal Fall 2013
