What people say about this book

Kytka Hilmar-Jezek, "The recipes are simple and easy to make and give a boost of energy. I'm a big fan of Superfoods Today and now have several books by this author. What I like most about this book is that he actually goes into how to add the ingredients into the blender for the perfect smoothie. Now, I know this sounds funny because most people think "what's the big deal? Put in the ingredients and blend", right? But I learned that I've been doing it wrong and the difference was in the taste and the consistency of my smoothie. This one little tidbit is worth the price of the entire book and that is why I am sold on Mr. Orwell's books. He writes from real experience and practicality. He explains why he does things a certain way and how he himself came to discover Superfoods. This gives me, the reader, a sense of connection and inspiration to actually stay on this regimen. Then the book moves into each delicious red recipe (complete with full color images) from both fruits and vegetables. Excellent!"
