What people say about this book

C B, "Fantastic variety of fun puzzles. My boys ages 11 and 12 went on an overseas trip. I bought this for the plane trip as an afterthought in addition to novels, comic books, rubics cubes etc. (I am not into the electronic devices) My boys spent the most time on this book. Each puzzle is different than the previous. It encompasses different topics, some jokes and all different challenges. I was very impressed with the content. In fact they continued working on it even when they got home. Def recommend this!"

Malisha, "For 9 year old. My 9 year old loves this book. She prefers the activities in "coloring/activity" books so this was perfect. We keep it in the car for a boredom buster."

Kathy A, "Not for 1st & 2nd graders. I would guess this activity book is geared for 3rd to 6th grade students. Even then the child may need access to the internet to find some answers; which is fine. Teaches them how to research for information. 2 people are required for some activities. I bought book for myself (75 yrs old) to help keep my mind active."

Angela R., "Honest Review. So I thought this was the size of a standard coloring book. But it was half that size. Its a smaller sized book and the inside of it was okay. It has things for them to do for about a week. I bought this for my 7 year old. She played in it as soon as we got it out from the package."

Susan, "Great variety. Lots of different types puzzles and colorful and appealing."

Maria Danner, "NOt a Cellphone. I think my grandchild will enjoy this puzzle book because it is grade level and a little above. He loves to read and do math and this book is just fun. I looked through it and I would do it myself. Anything that makes a child take his eyes of electronic devices is a good thing. Next. we want to get them outside communicating with friends."

Skozey, "kids enjoy it. The book is very interactive. Some of the puzzles are very hard for my kid who is 6yrs. It is very help in keeping the kids busy during this time when they are at home. 4 stars because paper is of not good quality."

Caren, "Grandchildren love it. This gives them something to do when visiting, besides TV."

L-J, "Really fun book with jokes puzzles mazes. Really fun book with jokes puzzles mazes, loads to do, will take a long time to do all the puzzles, also each page has things to learn about, Very educational, and fun at same time would definitely buy more of these, although this one was American which was OK as my niece is American and the history about presidents etc was spot on for her she is aged 10,"

vicstar, "Nice little book. Got this for my 6 year old but in hindsight it's a little old for her and so I'm going to give it as an Xmas gift to my 12 year old Book smaller than I thought but I'm very happy"

Hayley Caine, "Good value for money Highly recommended. Good value for money Highly recommended"

Maximus, "... gift for 8yr old they said it was a good book but had american numeracy not the £ but I bought this as part of a gift for 8yr old they said it was a good book but had american numeracy not the £ but otherwise a good learning book"

The book by School Zone has a rating of 5 out of 4.6. 2,457 people have provided feedback.
