About the Author Gary B. Shelly wrote and published his first computer education textbook in 1969. More than twenty million copies of Shelly Cashman Series' textbooks have been sold. Gary and a talented group of contributing authors have produced books on computer programming, computer concepts, and application software that are the leading textbooks in the computer technology market today. Gary has hosted the annual Shelly Cashman Institute, a week-long training event focusing on the latest topics in technology, for the past 34 years. Steven M. Freund attended the University of Central Florida and serves as a leader instructor of various Microsoft Office, computer concepts, programming, and Internet technology courses throughout Central Florida. An integral author for the successful Shelly Cashman Series since 2001, he has presented at the annual customer conference, the Shelly Cashman Series Institute, as well as other customer events. Mr. Freund has co-authored multiple editions of DISCOVERING COMPUTERS, Mozilla Firefox, Windows Internet Explorer, Windows, Office, and Dreamweaver books. He has also written numerous successful instructor supplements. Raymond E. Enger is the IT Program Director for the Osceola Campus of Valencia Community College where he has taught classes in computer programming, database design, operating systems, networking, security, and other IT areas since 2001. His background in programming includes C, C++, C#, Java, PHP, Perl, ASP, Visual Basic, and the other Visual Studio languages. Ray built the study tool for the last three editions of the Shelly Cashman Series' Systems Analysis and Design book and is also a co-author of the Microsoft Windows Vista series of books.

## What people say about this book

1AngryMarine, "WOULD RECOMMEND. I haven't completed this book yet but from I what I see, it is very much like the format the Windows Server 2008 Administration guide I bought. The one plus I like about these guides are the images of the windows the user is expected to see when completing the exercises. Another plus I like is it written so beginners can understand the material unlike some of the guides Microsoft publishes themselves."

Tyler, "Four Stars. good"

Saria Contreras M., "Perfect timing for shipping good book. Even that I ordered the incorrect one, I needed the textbook not the lab manual. it arrived earlier, which it was great and the conditions were perfect."

Casper, "Five Stars. excellent book for learning the material....simple...clear...easy to follow and practice exercises in it at the same time"

Dawn, "5 stars. Just what I needed. Received in perfect condition."

Dave.Y, "Four Stars. gives good information"
