## What people say about this book

audrey frances, "extremely good value for little connect-the-dotters. This is a terrific first connect-the-dot book for young children, and a great value. Thirty illustrations increase in complexity from 7 dots all the way up to twenty, as little ones draw a boat, star, dinosaur, train, etc. Pictures are suitable for coloring afterward."

J. Belkowski, "Great first dot-to-dot book. I purchased this book for my three year old and she loves it. We are working on what the numbers beyond 12 look like and this book gradually works up to 20. The pictures are very simple and she enjoys coloring them after completing the dot-to-dot. I would definitely recommend this book as a way of introducing your toddler to the world of dot-to-dots."

A. Economou, "Very good for beginners. I bought this book for my daughter who is five years old and just starting to be interested in these activities and she loved it. She finished it in two days and that is the only negative comment I have, since she was left wanting more!"

candace, "first step toward learning to write. I bought this book because I only needed something cheap to qualify for super saver shipping. My daughter is 2 and a half, and this book has become a favorite of hers! The puzzles are simple, and very rewarding. She gets so excited after she completes a picture and identifies it. Before dot-to-dot books, she'd only scribble circles and blobs. Because of books like this, she quickly developed better fine-motor skills, concentration, and draws straight lines! (I recommend using a crayon, since the pages are thin.)"

Ms Daniela Dourado, "Four Stars. Very nice first dot to dot book."
