## Synopsis

Written by some of the top researchers and clinicians in the field, *Communication Disorders in Multicultural Populations, 4th Edition* offers an in-depth look at the major cultural groups in the U.S. and the issues concerning their communication development, common disorders, and treatment options. This fourth edition features a wealth of updates and new features — including the latest research and added coverage of communication issues in countries such as Australia, China, Canada, and Brazil — to give speech-language pathology students and speech-language pathologists a balanced and global perspective on the most topical multicultural communication issues of today. Comprehensive coverage focuses on a wide variety of cultural and age populations. Cutting-edge research and data offer up-to-date discussions based on the latest studies in multiculturalism as it relates to the SLP and AuD professions. Diverse panel of expert authors include some of the top researchers and clinicians in the field. Additional resources provide a focused listing of print and electronic sources at the end of each chapter to support more in-depth study of a particular subject. Chapter on international perspectives tackles issues in countries such as Australia, Canada, China, and Brazil to give you a more global understanding of communication disorders. The latest statistics from the 2010 U.S. Census report offers the most current data available. Increased content on older adults covers the multicultural issues, voice disorders, and neurogenic disorders particular to this important demographic. Case studies give you practice solving realistic clinical problems. Chapter overview and conclusion outline the key information in each chapter and serve as a checklist for content mastery.

Alexandria McNair, "Good. Needed it for class, good descriptions of different cultures."

CSDMARY, "4TH EDITION IS SURE TO BE A CLASSIC. I have used the earlier editions of this book for several years. This new edition is a significant improvement. It goes beyond the major cultural groups in the United States and gives a global view of communication disorders intervention and treatment in cultural groups around the world. The new authors include scholars from around the world including Australia, Malta, Brazil. Given that the profession is more global and international, this textbook is unique and a welcome addition to the available literature. Of particular importance is the chapter on voice disorders and also the chapters on language development and indigenous groups because of their global focus. The chapter on global issues in hearing impairment is quite comprehensive and authoritative. References and resources are up to date. It is nicely written and the cover design is striking."
