Market Wizards: Interviews with Top Traders How to Make Money in Stocks: A Winning System
in Good Times and Bad, Fourth Edition

What people say about this book

Georgina, "Stop Loss vs Risk. The person who said that Kaufman does not believe in stop losses is quite INCORRECT. The whole purpose of this book is to weigh a stop loss against a possible incorrectly placed volatile sale. If anyone trades with a regular basis they know the horror of being 'stopped out' because of volatile price swings. Kaufman helps by correctly analyzing the benefits of stops vs losses showing how mechanized systems for stops have their own pitfalls. Kaufman's whole treatise on RISK is really worth the price of the book. Understanding risk and its effect on your psychology is an important and very valuable treatise. Kaufman does a very good job on the subject. Also of benefit, is the Adaptive Moving Average algorithm. While this is also part of Metastock having the formula is invaluable for those of us who want to modify it. The weakest part is the computerized system analysis at the end is old and rather simplistic; I would not recommend it. Some of the ideas are interesting but Pardo's book is much much better."

Richard Wilson, "Excellent. A really good book about TA. Many tools inside are useful for real-world trading. And it is also easy to read. Highly recommended !"

mnkk@vossnet.de, "A must for a system trader. The book covers system trading approach in a very systematic way. Additionally the book describes some "side" issues which in turn play a crucial role in the trading business. Recommended !"

ILIAS, "Five Stars. Excellent condition of the book."

Siegfried Groth, "good ideas inside. though this book isn't absolute new, I find a lot of good ideas inside. fine for my actual financial decisions"

The book by Victor Niederhoffer has a rating of 5 out of 4.3. 15 people have provided feedback.
