Synopsis

Easy-to-assemble, fun-to-fly models include such fascinating space vehicles as the Nile, Indus, Yangtze, Atlantis and 4 others. Step-by-step instructions plus clear diagrams show all levels of model builders how to create sturdy spacecraft with the help of common household items.

Sort review

A highly interactive book full of colour. The children enjoyed listening to the story and then delighted in singing the song at the end of the book. This die-cut book with holes is excellent for encouraging observation, colour and pattern recognition by searching for individual ants. It is also an excellent way to help children develop and understanding of quantities represented by the numerals 1 through to ten. --Sharon Campbell Nursery Education Plus 20090501

What people say about this book

S. Hulbert, "Great item purchased for my 8 year old son. I purchased this item for my 8 year old son and he loves making these. Well worth the money. What he likes to do is to print copies of the pages so that he is able to keep the original pages for making future planes again and again."

The book by David Kawami has a rating of 5 out of 5.0. 2 people have provided feedback.
